SUMMARY

Software Engineering student (B.S. expected 2027) and DevOps Engineer Intern with hands-on experience in Kubernetes, Helm, Istio, Docker, CI/CD, and AWS. Built containerized deployments, GitOps-oriented workflows, and production cloud infrastructure on AWS.

EXPERIENCE

Soliner | DevOps Engineer Intern

Jul 2026 - Present

- Worked with containerization and Kubernetes deployment configurations in a large BSS environment.
- Built a Helm chart from scratch with reusable templates and environment-specific values, including Deployment, Service, Namespace, and health probes.
- Configured Istio Gateway, DestinationRule, PeerAuthentication, and VirtualService resources; used VirtualService to route 80/20 canary traffic between application versions.
- Gained practical exposure to how Jenkins, ArgoCD, Bitbucket, Harbor, AWS ECR, and AWS EKS support CI/CD, GitOps delivery, image management, and cluster deployments.

TECHNICAL SKILLS

Cloud & Containers: AWS (EKS, ECS Fargate, ECR, IAM, ALB, ACM, CloudWatch, Secrets Manager, SNS, EventBridge), Kubernetes, Docker, Helm, Istio, Cloudflare DNS

Delivery & Operations: GitHub Actions, ArgoCD, Jenkins, Harbor, Bitbucket, CI/CD, GitOps, Linux

Development & Data: Node.js, JavaScript, Python, C#.NET Core, REST APIs, WebSocket, OAuth 2.0, PostgreSQL, MongoDB, Redis, Qdrant, RAG, LLMs, Vector Search

TECHNICAL PROJECTS

Trackruit | Job Application Tracking Platform

Docker | GitHub Actions | AWS ECS Fargate | ECR | Cloudflare DNS

- Containerized a Next.js application with a multi-stage Dockerfile and deployed it to AWS ECS Fargate through ECR, using ALB, ACM HTTPS, and Cloudflare DNS for production traffic.
- Built a GitHub Actions CI/CD pipeline that validates development branches and automatically builds, pushes, and deploys container images after production merges.
- Configured least-privilege IAM access, Secrets Manager, CloudWatch alarms, and SNS/EventBridge alerts for production operations.

PrePath | AI-Powered Technical Interview Simulator

Team Lead / Scrum Master | Academic Project | 2024 - 2025

- Led a 4-person engineering team, translating product requirements into sprint plans and integration checkpoints.
- Built a RAG backend using Qdrant and Dockerized services, indexed 40,000+ records for semantic retrieval, and fine-tuned open-source LLMs with LoRA/QLoRA.

Lyricaly.tech | Spotify API Web Application

Backend Developer | Production Deployment | 2024

- Built and deployed backend services with Spotify OAuth 2.0, secrets handling, and API health monitoring.

EDUCATION

Firat University | B.S. in Software Engineering | Expected 2027 | Elazığ, Turkey

Relevant Coursework: Cloud Solutions with AWS, Algorithm Analysis

University of Maribor | Erasmus+ Exchange, Computer Science | Feb 2025 - Jul 2025 | Maribor, Slovenia

COURSES & TRAINING

- Kubernetes Temelleri - Udemy**, Aug 2026
- Getting Started with Serverless - AWS Educate
- Introduction to Docker & Kubernetes; Intermediate Docker; Containerization & Virtualization Concepts - DataCamp
- Linux 301 - Turkcell Geleceği Yazanlar | Get Started with Redis - Redis University

Languages: Turkish (Native) | English (B2)
